

PERSONAL STATEMENT

I'm a 21 years old Creative Media science student, specialising in programming, UI/UX design and interaction design, based in Hong Kong. I am passionate in everything about technology, design, consumer electronics and digital media. I feel my true devotion for the tech industry.

I have been craving to settle and work in the Bay Area in California, USA, in the reason of a trip to the US 2 years ago, and also being influenced by my cousin who is a product designer at Lyft.

I am now 100 percent ready of an intern or a job. Go further below to understand me more.
